Appendix 6 - SHLAA RAG Assessment

		SUITABILITY CRITERIA																										AVAILABILITY CRITERIA						ACHIEVABILITY CRITERIA				DEVELOPMENT POTENTIAL		
Reference number	Site name/address	Area of Outstanding Natural Beauty	Conservation Areas	European/National Wildlife Site and European Protected Species	Flood Risk	Heritage Assets	Local Wildlife Site	Local Geological Sites	Major Infrastructure	Minerals and Waste	Access to Site	Accessibility to Local Facilities	Public Transport	Relationship to Highway Network	Coalescence	Relationship to Settlement	Neighbourhood Amenity	Neighbouring Land Uses	Landscape Sensitivity	Agricultural Land Classification	Contaminated Land	Tree Preservation Orders (TPO)	Pollution	Site Assembly	Site Shape	Site Topography	IS THE SITE CONSIDERED SUITABLE? (Y/N)	Current Use	Intentions	Legal	Ownership	IS THE SITE CONSIDERED AVAILABLE? (Y/N)	Proceed to Assessability Assessment? (Y/N)	Local Market Analysis	Site History	Viability	IS THE SITE CONSIDERED ACHIEVABLE? (Y/N)	Gross Site Area	Net Area*Density	Capacity
		The NPPF requires great weight to be given to conserving the landscape and scenic beauty of AONB.	Development should seek to enhance the significance of Conservation Areas and make a positive contribution	The NPPF affords significant protection to these important wildlife habitats including RAMSAR, NNR, SAC, SSSI and Ancient Woodland. Development that causes harm to the geological and conservation interests on such sites will not be permitted. Particular species and their habitats are also protected by law (e.g. bats).	The NPPF sets out a sequential approach to development with the aim to steer development away from areas of highest risk (Zone 3). Surface water flooding could also act as a constraint on development. Information provided from the Environment Agency and Strategic Flood Risk Assessment (SFRA).	The NPPF seeks to conserve heritage assets in a manner appropriate to their significance. Substantial harm or loss to Scheduled Monuments, Registered Historic Parks and Gardens, and Listed Buildings should be exceptional or wholly exceptional.	In additional to nationally important sites, Warwickshire County Council has identified sites of local wildlife value. Development should not significantly affect the biodiversity value of these sites.	The NPPF seeks to protect and enhance geological conservation interests. Local geological sites are geological or geomorphological sites in a county considered worthy of protection. Development should not significantly affect the biodiversity value of these sites.	Is the site affected by major infrastructure (e.g. the route of High Speed 2, HSE Pipelines etc)?	Development should not affect sites allocated or safeguarded for minerals extraction or waste management in the Minerals and Waste Local Plan.	Is there satisfactory access to the site from the road network that is likely to meet highway standards?	Is the site within reasonable walking distance of local services and facilities (e.g. shop, school, doctor's surgery)?	Is the site accessible to public transport services (400m/5mins to bus or 800m/10mins to rail)?	Is the site well located in respect of the road network and vehicle movements?	Does the site form an important contribution to defining and maintaining the separate identity of the settlement?	Does the site relate well to the existing built form / character of the settlement? NB: landscaping can help to mitigate impacts.	Would development of the site significantly impact upon the amenity of neighbouring occupiers (e.g. overlooking etc)?	Is the site affected by neighbouring uses (e.g. incompatible use)?	The Sensitivity of the landscape is its ability to accommodate a certain type of change or development. A Landscape Sensitivity Study was undertaken in 2006.	Is the site classified as being the best and most versatile agricultural land? (1 = excellent; 2 = very good; 3a = good; 3b = moderate; 4 = poor; 5 = very poor)	Is the site likely to be affected by contaminated land (e.g. petrol filling stations, industrial land etc.) Detailed site assessment may be required to establish whether actual contamination exists irrespective of this analysis.	Trees provide amenity value and are an important feature of the townscape and landscape and should be retained.	Is the site likely to be affected by either noise or air pollution including AQMAs?	Could the site form part of a larger site that is suitable for development? Would development of this site restrain other development?	Does the shape of the site constrain development?	Does the topography of the site constrain development		Occupied sites may affect the likelihood of development in the short term. This includes land in existing or former employment, community or leisure use, shops and open space (**E.g. policy designations**)	Is there an intention by the landowner to sell / develop and is there a developer in place to bring the site forward?	Are there any legal issues (e.g. multiple land ownerships, ransom strips) that may affect the site coming forward for development in the short term?	Has the landowner been identified?			Is there demand within the local market for the site to sell? What competition is there for prospective purchasers?	Does the planning history provide any information as to the likely development of the site? (NB. The presence of planning permission does not automatically mean a site will be developed)	Is development currently considered economically viable?		Ha	76% Gross:Net (<45ha sites) 50% Gross:Net (>45ha sites)	No. Dwellings
